Memphis

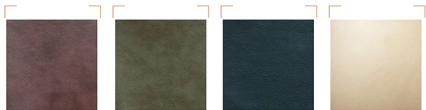

FAUX LEATHER

Memphis is a stunning development of Faux Leather which is very soft and supple to the touch. Colours have been carefully selected and will enhance any home or contract situation.

Composition:	80% Polyurethane, 20% Cotton
Width:	140cms. (55") approx
Usage:	Severe contract upholstery
Rub Test:	200,000 Test certificates available on request

Cleaning / Care: Regularly clean with a damp cloth and Hoover with a soft brush avoiding any chemical polishes and soaps.

Enhanced cleaning can be done with a damp cloth and a solution of 1% mild soap.

Fire Retardancy: This fabric conforms to BS 5852 Part 1 Cigarette & Match Test when tested with flexible urethane foam at nominal density of 22kg/cm and BS 5852 1990 CRIB Ignition Source 5 when tested over non-combustion modified foam with a density of approximately 35kg/m³, reference RB35H.

The Appendices of BS 7176 predict that when tested over melamine-based combustion modified foam filling the result will be equal to, or better than, that obtained with the RB35H foam mentioned above.

Colour Matching: Every effort is made to ensure the closest possible colour match to our pattern books but we are unable to guarantee an exact match. If you require to match to fabric, please send us a sample or request a stock cutting of the shade. Always check fabric before cutting.

Samples will be sent on request.

It is manufacturers recommendations that all cushions should be wrapped in calico or other suitable inner lining and that a 1/2" seam be taken up when machining.
